CAREER OBJECTIVE

Second-year Computer Science student at HCMUT seeking a Full-Stack Developer Internship. Strong foundation in React, Next.js, Node.js, Express.js, relational and NoSQL databases, distributed messaging, AI retrieval, CI/CD, and AWS cloud architecture. Eager to contribute across the software delivery lifecycle while building reliable, maintainable, and user-focused web applications in a collaborative engineering team.

EDUCATION

 **Ho Chi Minh City University of Technology (HCMUT) - VNU** Year 2
Computer Science Undergraduate | GPA: 3.6/4.0

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend Development: React, Next.js, React Router, Context API, Redux, Zustand, Tailwind CSS, Material UI, Ant Design, Responsive Web Design
Backend Development: Node.js, Express.js, RESTful APIs, JWT, OAuth, RBAC, file upload, validation, error handling
Databases & Data Access: PostgreSQL, MySQL, MongoDB, Redis caching, relational schema design, document modeling, indexing, transactions, Prisma, Sequelize, TypeORM
AI & Retrieval: Retrieval-Augmented Generation (RAG), embeddings, vector search, context retrieval
Messaging & Real-Time: RabbitMQ, asynchronous jobs, Redis Pub/Sub, WebSocket, Socket.IO
Testing & API Tools: Jest, Vitest, Supertest, Swagger/OpenAPI, Postman
DevOps & CI/CD: Docker, Docker Compose, GitHub Actions, Linux, application deployment
AWS Services: EC2, S3, RDS, IAM, CloudFront, CloudWatch
Version Control: Git, GitHub

KEY ACHIEVEMENTS

AWS Certified Solutions Architect - Associate	Amazon Web Services
HCMUT Hackathon - Award Recipient	HCMUT
IELTS Academic - Overall Band 6.5	English Proficiency

TECHNICAL HIGHLIGHTS

- Frontend Engineering:** Build responsive React and Next.js interfaces with reusable components, server-side rendering, client-side routing, and predictable state management.
- Backend & API Development:** Develop RESTful Node.js and Express.js services with authentication, RBAC, input validation, file handling, and centralized error handling.
- AI & Data Retrieval:** Build RAG pipelines with embeddings and vector search to retrieve relevant context and produce grounded, context-aware AI responses.
- Caching & Event Processing:** Use Redis for caching and Pub/Sub, RabbitMQ for background jobs and notifications, and Socket.IO for bidirectional real-time features.
- Cloud Delivery:** Containerize services with Docker Compose, automate CI/CD with GitHub Actions, and deploy with AWS EC2, RDS, S3, IAM, CloudFront, and CloudWatch.
