

TRẦN NHẬT BẢO ANH

Software Engineering / Cloud & DevOps Intern

(+84) 708 784 915 - trannhatbaoanhtnba@gmail.com

github.com/tranbaoanh21 - linkedin.com/in/bao-anh

PROFILE

Third-year Computer Science student and AWS Certified Solutions Architect - Associate seeking software engineering or cloud/DevOps internships. Foundation in TypeScript web applications, API and database design, containerization, CI/CD, and AWS architecture. Additional knowledge of retrieval-augmented AI integration for application features.

EDUCATION

Ho Chi Minh City University of Technology (HCMUT)

Year 3

VNU - HCM | Computer Science Undergraduate | GPA: 3.6/4.0

SOFTWARE ENGINEERING SKILLS

Languages & Frontend: TypeScript, JavaScript, SQL, HTML/CSS; React, Next.js, server-side rendering, Redux/Zustand, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, JWT, OAuth, RBAC, middleware, request validation

Data & Persistence: PostgreSQL, MySQL, MongoDB, Redis; schema design, indexing, transactions, Prisma

Messaging & Real-Time: RabbitMQ, background jobs, Redis Pub/Sub, WebSocket, Socket.IO

Testing & Collaboration: Jest/Vitest, Supertest, Swagger/OpenAPI, Postman, Git, GitHub

CLOUD & DEVOPS SKILLS

Delivery Tooling: Linux, Docker, Docker Compose, GitHub Actions; containerization and CI/CD workflows

AWS Compute & Network Knowledge: EC2, ALB, Auto Scaling, ECS/Fargate, Lambda; VPC, subnet routing, NAT Gateway, VPC endpoints, Route 53

AWS Data & Delivery Knowledge: S3 versioning/lifecycle, CloudFront; RDS/Aurora Multi-AZ and read replicas; ElastiCache; SQS/SNS

AWS Security & Operations Knowledge: IAM roles/policies, security groups/NACLs, KMS, Secrets Manager; CloudWatch logs/metrics/alarms, CloudTrail

CERTIFICATIONS & ACHIEVEMENTS

AWS Certified Solutions Architect - Associate

Amazon Web Services

ADC Hackathon - Award Recipient

IELTS Academic - Overall Band 6.5

English Proficiency

TECHNICAL COMPETENCIES

- Application Engineering:** React/Next.js rendering and reusable components; Express middleware boundaries, JWT validation, role-based authorization, request validation, centralized error handling, and API integration testing.
- Data & Service Integration:** Relational modeling, indexes and transaction boundaries; MongoDB document modeling; Redis caching and expiration; RabbitMQ producer/consumer workflows and Socket.IO event handling.
- Containerization & CI/CD Knowledge:** Docker images and Compose service configuration; GitHub Actions build, test, and deployment stages; environment configuration and service connectivity across application and database containers.
- Cloud Architecture Knowledge:** Public/private tier isolation, ALB and Auto Scaling across Availability Zones; RDS Multi-AZ availability versus read-replica scaling; S3/CloudFront delivery and managed/serverless compute trade-offs.
- Security & Operations Knowledge:** Least-privilege IAM, security group/NACL boundaries, KMS and secret management; CloudWatch monitoring versus CloudTrail auditing; storage lifecycle policies and compute right-sizing.

SUPPORTING SKILL: AI INTEGRATION

Retrieval-Augmented Generation (RAG): document chunking, embeddings, vector similarity search, and retrieval of context for AI-assisted application features.
